— COMPANY OVERVIEW

Designed Around **Architecture**

ARQUON believes lighting should not be treated as a last-minute electrical item. It should be planned with architecture, interior design, material selection, mood, function and long-term user comfort. The brand brings together architectural lighting and smart automation to create spaces that look premium, feel convenient and perform reliably. From a luxury villa to a showroom, hotel, restaurant or workspace, ARQUON focuses on delivering the right product, right placement and right control experience.

BRAND BELIEF

"Lighting should complete architecture, not compete with it."

Architectural

Clean forms, premium finishes and balanced light distribution for beautiful spaces.

Smart

Automation solutions that make daily use simple, secure and effortless.

Project

Documentation, quotation support and coordination guidance for project teams.

MANUFACTURED IN INDIA

COB track spotlight — accent lighting from an ARQUON residential project.

— PURPOSE

Vision, Mission & Values

VISION

To become a trusted premium lighting and automation brand that helps architects, designers, homeowners and businesses create beautiful, efficient and future-ready spaces.

MISSION

To deliver design-focused products, practical project support and reliable service through a complete ecosystem of lighting, automation, documentation and after-sales assistance.

CORE VALUES

Design First — Every solution must protect architectural aesthetics and space experience.

Technical Clarity — Clear specifications, application guidance and quotation-ready documentation.

Reliable Performance — Products and solutions selected for practical usage and long-term value.

Professional Support — Dealer, designer, architect and client support through each project stage.

Continuous Innovation — Lighting and automation must keep evolving with modern project needs.

— HOW WE THINK

A Design-Led Approach to Lighting

A successful lighting project is not only about wattage. It is about beam angle, glare control, CRI, CCT, dimming, surface finish, ceiling height, wall texture, furniture layout, usage pattern and mood.

1

Space Study

Understand room type, ceiling height, furniture layout and visual intent.

2

Lighting Concept

Select ambient, task, accent and decorative layers as per application.

3

Product Matching

Match fixtures, finish, beam, wattage, CCT and control method.

4

Automation Fit

Add smart switching, scene control and safety where it improves usage.

5

Project Support

Provide quotation, coordination and after-sales support.

LIGHTING LAYERS

Ambient

General light layer for comfortable base illumination.

Accent

Focused highlights for walls, art, textures and display zones.

Task

Functional light for work counters, reading and utility zones.

Smart

One-touch moods for daily life, hospitality and retail experience.

— PRODUCT & SOLUTION ECOSYSTEM

One Brand. Multiple Premium Solutions.

ARQUON's product universe is planned around three major solution lines — indoor architectural lighting, outdoor and landscape lighting, and smart automation — that come together into one coordinated experience for villas, showrooms, hospitality, commercial and residential projects.

Indoor Architectural Lighting

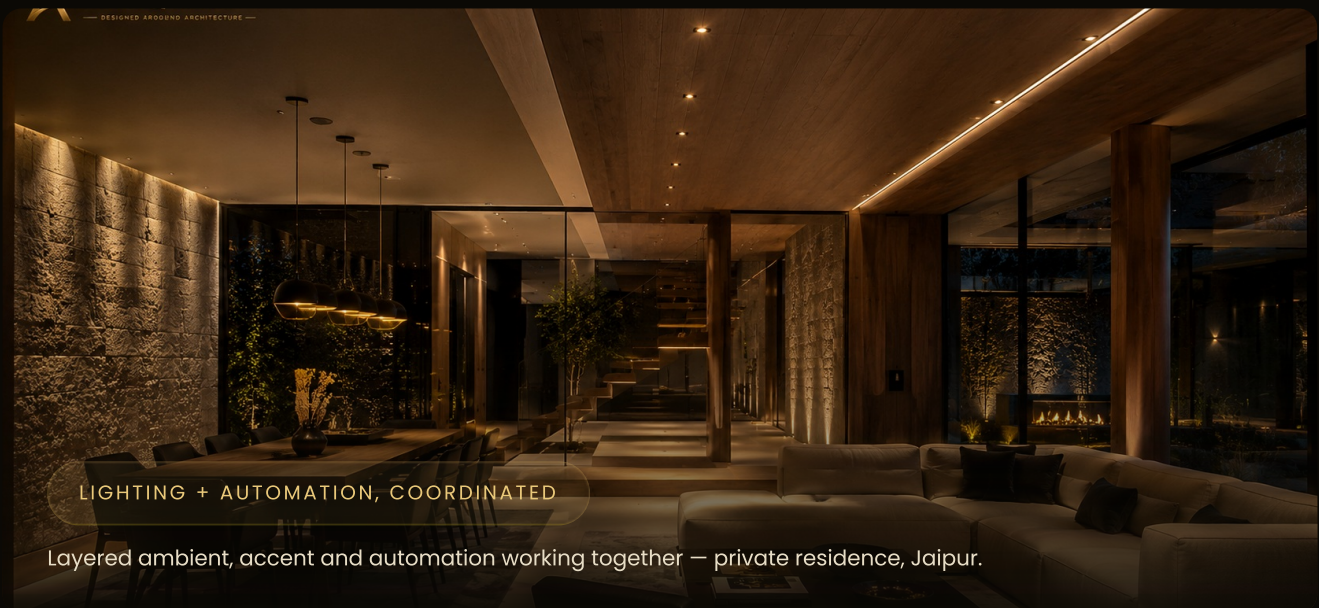

COB, downlights, surface lights, track systems, magnetic systems, linear profiles and premium ceiling solutions.

Outdoor & Landscape Lighting

Wall lights, facade lights, garden lights, step lights, bollards, flood lights and waterproof solutions.

Smart Automation

Touch switches, door locks, video door phone, curtain control, sensors, app and voice-enabled smart control.

Lighting & Ambience

Comfortable illumination & mood

Security & Access

Door lock & safer entry

Comfort Control

Curtains, scenes, fan, AC

Client Experience

Touch, mobile, remote, voice

— INDOOR PRODUCT RANGE

Indoor Architectural Lighting

ARQUON indoor lighting is planned for premium interiors where light quality, finish, beam control and fixture detailing directly affect the final architecture and ambience.

Linear profile lighting set into a custom furniture edge.

COB Spot Lights

Focused accent lighting for luxury interiors, display walls, niches and premium rooms.

Flat Downlights

Soft general lighting for bedrooms, corridors, offices and residential interiors.

Surface & Cylinder Lights

Premium visible fixtures for false ceiling-free areas and design-led spaces.

Track & Magnetic Systems

Flexible lighting systems for galleries, showrooms, retail and modern homes.

Linear Profiles

Continuous lighting for ceilings, coves, wardrobes, counters and architectural lines.

Strip & Neon Solutions

Mood lighting, backlighting and detail enhancement for furniture and interiors.

— OUTDOOR PRODUCT RANGE

Outdoor, Facade & Landscape Lighting

Outdoor lighting gives a project its night identity. ARQUON outdoor solutions support elevations, pathways, gardens, facades and commercial exteriors with premium finish and practical durability.

Facade wall lighting and landscape wash — private villa, Gurugram.

Wall Lights & Up-Down Lights

Elegant wall illumination for facades, corridors, balconies and entrances.

Step and Stair Lights

Low-level safety and accent lighting for stairs, passages and outdoor pathways.

Bollard and Garden Lights

Landscape lighting for pathways, lawns, resort areas and residential gardens.

Flood and Wash Lights

Powerful wash lighting for facades, signage, boundary walls and large surfaces.

Street and Area Lights

Functional outdoor illumination for larger locations and commercial surroundings.

— SMART CONTROL

Automation for Premium Spaces

ARQUON smart automation helps users control lighting, fan, AC, curtain, door access and daily scenes with smooth touch, mobile app, remote or voice-based convenience.

Touch Switch Systems

Premium glass touch switches with elegant icon layouts and scene-friendly controls.

Scene Control

One-touch moods for entertaining, relaxation, presentation, retail display and daily routines.

Mobile & Remote Access

Easy control through mobile, remote and compatible smart-home interfaces.

Voice Integration

Supports modern smart-home experience with compatible voice control ecosystems.

Door Lock & Security

Smart door locks and access solutions for luxury homes and professional spaces.

Curtain Motor Control

Motorised curtain and blind control for convenience, privacy and premium lifestyle.

— CUSTOMISATION

Custom Touch Switch **Design Studio**

ARQUON's touch switch design approach allows the client, dealer or sales team to plan panel size, glass color, icon selection, room-wise controls and final layout before production or installation.

Plate Sizes

2M, 4M, 6M, 8M and 12M planning options.

Glass & Touch Color

Premium color combinations for interior matching.

Icon Library

Room-wise and appliance-wise icons for neat visual clarity.

Button Shapes

Round, square, rounded square and minimal dot touch styling.

Client Preview

Before-finalization preview for approval and production coordination.

Project Flow

Design leads can connect with CRM, quotation and production workflow.

— WHERE ARQUON FITS

— IN THEIR WORDS

Client Testimonials

Feedback from the architects, designers and homeowners ARQUON has worked alongside.

"ARQUON helped us layer accent and ambient lighting so the interiors matched our design intent perfectly – the room-wise planning made coordination with site teams much easier."

Ar. Nikhil Sharma

Principal Architect, Jaipur

"The touch switch customisation and room-wise control mapping made the smart home rollout simple for our client. The preview-before-production step avoided a lot of back and forth."

Priya Kapoor

Interior Designer, Udaipur

"From quotation to installation, the coordination was smooth and the after-sales support has been reliable whenever we've needed it."

Rohit Agarwal

Homeowner, Gurugram

— FROM CONCEPT TO EXECUTION

Professional Project Consultation Workflow

ARQUON supports clients, architects, dealers and project teams with a structured workflow that reduces confusion and helps convert product selection into a clear project-ready solution.

1

Requirement

Discuss space, usage, budget and design expectation.

2

Selection

Choose suitable lighting, automation and finish options.

3

Quotation

Product-wise or room-wise commercial proposal.

4

Approval

Finalize design, quantities, controls and support needs.

5

Supply

Coordinate delivery, documentation and project support.

6

Support

After-sales, warranty and service workflow.

Room-Wise Lighting Planning

Plan fixtures room by room so the client understands application and quantity.

Product Documentation

Datasheets, technical details and product information for project clarity.

Smart Control Mapping

Map switch panels, scenes, curtains, doors and automation points.

Professional Proposal

Clean quotation format with product details and premium client presentation.

Coordination Support

Support for designers, dealers, electricians and project execution teams.

After-Sales Assistance

Service, warranty and issue-resolution support after installation.

— QUALITY APPROACH

Quality & Technical Guide

ARQUON recommends every product based on practical site needs and important technical parameters, so the final solution is attractive as well as suitable for performance, safety and daily usability.
